What it is. A quick 1:1 read-aloud screen for every candidate from Year 1 to Year 10. The student reads sentences that get harder, from a reading age of about 5 to adult level, until they can no longer read them. It gives an **indicative reading age**, an accuracy profile, a **fluency** rating and an **understanding** check. It takes 2 to 6 minutes. In Years 1 to 3 it follows the Early Reading Screen; from Year 4 it opens the interview.

You need: the student card (`Sentence_Reading_Card`), this record, a pencil, and a plain card or sheet of paper to cover the sentences the student has not reached yet (this stops a page of text looking frightening).

1. Start, carry on, stop

Year applied for	1	2	3	4	5	6	7	8	9	10
Start at level	1	1	2	3	4	5	6	7	8	9
First sentence	1	1	4	7	10	13	16	19	22	25

- If you already know the student is new to English, start at Level 1 whatever their age.
- **Going back (basal).** If the student scores 6 out of 6 on the start level, give full credit (6 points) for every level below it. If they score less than 6, go back one level at a time until they score 6 out of 6 on a level (or you reach Level 1). Then carry on upwards from the level after the start level.
- **Stopping (ceiling).** Always finish the start level. Then stop at the end of any level where the student scores **2 points or fewer**. Stop straight away if the student scores 0 on **three sentences in a row**, or if they become upset. Levels above the stopping point score 0.

Say: "I would like you to read some sentences out loud for me. They start easy and get harder. When they get too hard, that is fine, we will stop. If you do not know a word, have a go. Ready?" Point to the first sentence. You may say "Have a go" or "Try the next word". Do not sound out, explain or translate any word.

2. Scoring each sentence

Errors in the sentence	Points
none (self-corrections are fine)	**2**
one	**1**
two or more	**0**

These count as one error each

Code	Error	Example
S	**Substitution**: says a different word or a non-word	"horse" for house; "sur-pried" for surprised
O	**Omission**: leaves out a word, or leaves off a written ending that changes the word (-s, -ed, -ing, -ly)	"The frog jump out" for jumped
I	**Insertion**: adds a word that is not there	"the a red bus"

Code	Error	Example
T	**Told**: no attempt after about 5 seconds; say the word, mark T	
	Two words read in the wrong order	one error

These are not errors (mark them, but do not count them)

Code	What happens	Why it is not an error
SC	**Self-correction**: reads a word wrongly, then puts it right	The student is checking meaning.
R	**Repetition** of a word or phrase	
	Pauses, or sounding out and then blending the word correctly	Note it for fluency instead.
	Accent and pronunciation features common for speakers of Chinese, when the word is still clearly the right word: l and r ("lice" for rice), n and l, v and w, th as s, f, d or z ("sink" for think), a light or missing final consonant sound, an extra vowel after a final consonant ("bed-uh"), the -ed ending said in full ("jump-ed"), stress on a different syllable ("ho-TEL", "PHO-to-graph")	These are features of a learner's spoken English, not of reading. If the sound changes the word into a different word that makes sense, and you cannot tell which was meant, count it.
	Names (Ling, Jun, Mei) read in any reasonable way	
	Reading the British spelling as written ("tyres", "colour")	

When you are not sure, give the student the benefit of the doubt and write what they said in the notes. Patterns in the notes (for example missing -ed endings throughout, or pinyin letter values such as "i" read as in pinyin) are useful evidence for the English profile.

3. Understanding (the meaning check)

After each level the student reads with **3 or more points**, ask the meaning question for that level (printed in the record). Read the question aloud once and let the student answer in their own words. Record ✓ (understood), **½** (partly) or ✗ (not understood). The answer must be in English: one word or a short phrase is enough, and pointing to the right words in the sentence also counts. An answer in Chinese is recorded ✗.

4. Fluency

Rate the student's reading on the **last level they read with 4 or more points**.

Rating	What it sounds like
1	Word by word. Long pauses. Little sense of the sentence as a whole.
2	Mostly two- or three-word groups, with some word-by-word reading. Little expression.
3	Mostly in sensible phrases. Some pauses to work out harder words. The sentence makes sense to the listener.
4	Smooth and phrased, close to natural speech, with stress and expression that show understanding.

	Meaning (sentence 35): "How did the meteorologist feel about the forecast?" *Accept: Did not believe it, doubted it, wanted it checked again.*	☐✓ ☐½ ☐✗	
	Level total	/ 6	

6. Reading age

Total points = points scored + 6 for every level below the basal level that was not read.

Reading age (years:months) = 5:00 + 2 months for every point (0 points: below 5:00). So 6 points = 6:00 (Level 1 secure), 12 points = 7:00, 30 points = 10:00, 60 points = 15:00, 72 points = 17:00 (the ceiling: report "16 years or above" for 66 points or more).

7. What the result means

This screen is not standardised. The reading ages come from the way the sentences were built (how common the words are, the spelling patterns in the English National Curriculum word lists for each year, and the length and

structure of the sentences). Treat a reading age as a range of about 6 months either side. Once 30 to 50 students have taken it, compare their reading ages with the reading paper and with how they get on in class, and adjust the guide below if needed.

The reading band. In Years 1 to 3 the reading band comes from the Early Reading Screen; in Years 4 to 10 from the reading paper. This screen confirms the band. Use the table as a guide; if this screen and the main reading result differ by more than one band, look for the reason (below).

Reading age compared with actual age	Years 3 to 5	Years 6 to 10
At or above actual age, or close below it	up to 6 months below: **E**	up to 12 months below: **E**
Below	7 to 12 months below: **D**	13 to 24 months below: **D**
Well below	13 to 24 months below: **C**	25 to 42 months below: **C**
Far below	25 to 36 months below: **B**	43 to 60 months below: **B**
Very far below, or Level 1 not secure	more than 36 months below: **A**	more than 60 months below: **A**

- **Years 1 and 2.** Many fluent English speakers score 0 to 6 points at the start of Year 1. At the start of Year 2 a fluent reader usually has Level 1 secure and often Level 2. Use the reading age as supporting evidence only.
- **Decoding ahead of understanding.** If the meaning checks on the last two levels read are mostly ✗, move the band down one. This is common for students who learnt phonics or the phonetic alphabet well but have a small English vocabulary: they can "say" words they do not know.
- **Understanding ahead of decoding.** A student who understands well (✓ throughout) but stops early on long, rare words may be a confident English user who has had little reading practice, or may have a specific difficulty with reading. Look at the Early Reading Screen or the reading paper and, if there is a pattern, raise it in the summary.
- **Low fluency** (rating 1 or 2) with a good reading age often means effortful decoding: the student will find long texts in English tiring at first.
- **Level 1 not secure** at any age: use the letter sounds and Section 1 words of the Early Reading Screen to find what the student knows.
