Admissions assessment pack, version 3.1: overview for review

What this is. A ready-to-run assessment for students joining the English-medium international programme in Years 1 to 10, most of them from Chinese schools. It measures English (listening, speaking, reading, writing), maths, science from Year 5, and who the student is (interview and parent conversation). This zip is the whole pack arranged as the admissions team would receive it, so that you can review how it is organised. Nothing needs filling in.

How it is organised: simple on top, detail underneath.

Folder	What is in it	Who uses it	Print?
`01_Start_Here`	The admissions team pack (8 pages) and three one-page day sheets, for Years 1 to 3, 4 to 6 and 7 to 10	Admissions team, assessors	Once. Pin up the day sheet
`02_Print_For_Each_Candidate`	One PDF for each year group with everything for one candidate	Admissions	Yes: one for every candidate, double-sided
`03_Print_Once_Assessor_Folders`	**The detailed back-up:** the assessor instructions (scripts, answers, mark schemes, band guides), the interviewer guide and the sentence reading guide, one folder for each year group; the reading cards	Assessors, the principal as interviewer	Once, kept in a folder. Laminate the cards
`04_Listening_Recordings`	A recording for every year group, with a read-me	Assessors	No: play on a laptop or phone
`05_Send_Before_The_Visit`	The previous homeroom teacher reference (English and Chinese)	Admissions	Send to the student's current school
`06_Full_Guide_And_Evidence`	The full guide for staff, the reading books list, the listening evidence statement, the version register	Heads of section, the English team	Keep as background
`07_Single_Sheets`	Every sheet as a separate PDF	Admissions	Only to reprint one sheet

What is in a candidate pack, in order. The student paper; the grading sheet; the Reading front sheet; the Interview sheet; the parent conversation record; the final mark sheet; and the **assessment result and report**, the one-sheet front cover that goes with the marked papers once the decision is confirmed. Years 1 to 3 also have the Early Reading Screen record, of which only the sheets needed are printed.

A visit in six steps

1. The family arrives; a member of staff starts the parent conversation (about 15 minutes).
2. The assessor runs the sections on the day sheet, playing the listening recording.
3. The assessor marks the paper and fills in the grading sheet and the reading levels.
4. The reading levels and the interview sheet go to the interviewer, usually the principal.
5. The principal runs the sentence reading and the interview, and completes both sheets.
6. Within two working days the final mark sheet is completed and the head of section confirms the decision. Admissions then completes the result and report and gives it with the marked papers. No results are given on the day.

Quick facts. Every year group from 1 to 10 uses version 3.1, shown on every paper. The visit takes about 45 minutes in Year 1 to about 95 in Years 7 to 10. Staff paper for each candidate is about 16 pages, down from about 32. The papers are English only.

What I would like you to check

1. Is the folder order what an admissions officer would expect to open first?

2. Are the names clear without explanation (for example "Print once assessor folders")?
3. From the team pack alone, could you print the right pack for a Year 5 candidate and know what to do next?
4. Is anything missing that admissions would expect (a parent letter, a booking form, a results letter)?
5. Is anything repeated, or confusing to find?

Still to do before it is used with families. A maths and English teacher read-through of the papers and grading sheets; listening to each recording (the voices are text to speech); a native-speaker check of the Chinese text in the homeroom teacher reference; one open maths wording question in Year 2; checking the result and report against the school's policy on sharing results; and a trial with one student in each phase. The bands are provisional until about 20 to 30 students have been assessed.
